„In all things acting at the right moment is crucial for success.“ Menander

For us, everything revolves around nothing - the vacuum.

This year, we look back on **25 successful years of ideas in vacuum technology**
and would like to express our sincere thanks to you.

With an extensive portfolio, we see ourselves today not only as a creative developer and producer of vacuum measurement technology, but also as a sustainable and comprehensive service provider for all aspects of vacuum technology.

You as our customers and suppliers, friends and employees have also contributed to this success story.

We would have gladly to invite you to a joint celebration of this anniversary, but the concern for everyone's health and well-being is our top priority. So, all of you stay healthy and loyal to us!

JEVATEC GmbH - Our success story from 1996 until today

Foundation of the company as VACOM Steuerungsbau und Service GmbH in Jena, the high-tech location in Thuringia

1996

1997

Market launch of the world's first active wide-range vacuum gauge

1998

Start of modernisation of vacuum coating systems

1999

Development of a Profibus DP interface for the second generation of the wide-range vacuum gauge especially for industrial customers

2000

Move to the new company complex in the Schreckenbachweg 8 in Jena

2001

Development of a single-channel vacuum controller for active vacuum sensors under private label

2002

Production of the 500th wide-range vacuum meter

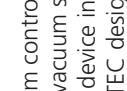

2003

Profinet-DP coupling for mass flow controller

2004

Two- and three-channel devices complete the series of controllers for active sensors under private label

2005

After intensive preparation the certification of the company according to DIN EN ISO 9001

12 100 28902 TWS

2006

Manufacturing of the 2000th wide range vacuum meter

2007

Construction and assembly of vacuum coating systems

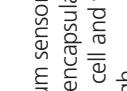

1999

Development and start of production of an active hot cathode vacuum meter

2000

The 10,000th single channel vacuum indicator for active sensors is manufactured

2001

VACOM Steuerungsbau und Service GmbH becomes JEVATEC GmbH

2002

We bring light to nothing with the flange-mounted halogen recessed lighting FHL

2003

Controller series for passive sensors is extended by a UHV measuring device

2004

The vacuum controller YCU for active vacuum sensors is the first device in the new JEVATEC design

2005

Our equipment brands JEVAmet®, JEVAlow®, JEVAlux® and JEVASys® are launched

2006

Expansion of our JEVAlux® product range. Innovative LED lighting technology for vacuum chambers

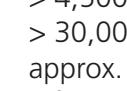

2007

Wide range vacuum gauge ATMION® now directly ex works incl. repair service and spare part service

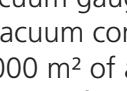

2008

Selected products together with our partners vakuumFINDER.DE in the online store

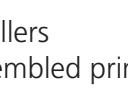

2009

Fore-vacuum sensor JEVAmet® PRM with encapsulated Pirani measuring cell and welded feedthrough

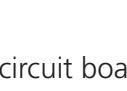

2010

Weldable SUB-D feed-throughs in 9-, 15- and 25-pin version for UHV applications

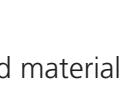

2011

25th company anniversary

2012

Controller series for passive sensors is extended by a UHV measuring device

2013

Success in numbers

Almost 1 million working hours for development, production and service

> 4,500 vacuum gauges

> 30,000 vacuum controllers

approx. 1,000 m² of assembled printed circuit board material

infinite amount of solder

approx. 17 tons of aluminium

approx. 4 tons of stainless steel

> 8 km PTFE special line

> 3,000 pump repairs

...
